GeoPackage

Johan Timrén

OGC GeoPackage

An Open Format for Geospatial Information

GeoPackage is an open, standards-based, platform-independent, portable, self-describing, compact format for transferring geospatial information.

Vad är GeoPackage

ESRI File geodatabase

- Access + spatial funktioner
- Slutet format – ESRI
- Allt i ett
 - Raster
 - Vektor
 - SQL-frågor, filter, vyer etc.....

GepPackage

The GeoPackage specification describes a set of conventions for storing the following within an **SQLite** database:

- vector features
 - tile matrix sets of imagery and raster maps at various scales
 - extensions
-
- These capabilities are built on a common base and an extension Mechanism is described to provide implementors a way to include additional functionality in their GeoPackages.
